Travel Tool Weekly Report
Week of 2-3-21

By Rudolph Hanzes, Gregory Bittinger, Kaleb Piper, Jacob Johnson, and Robert Minerd

Summary

We have developed and established a working website where we can add documentation, provide weekly reports, information about our project, and began implementation on the web-based project itself within the website.

What Was Accomplished Last Week?

- https://zetro7.github.io/TravelTool/ created.
- Documents added.
- Gantt chart created.

What Problems Were Encountered?

- We have some formatting issues within the website to be worked out, basically words not fitting properly and some required organization.
- We spent a good bit of time figuring out the best method to create the Gantt Chart.
- Once we found a good template, we had some difficulty dividing up the phases and estimating time utilization for each task/phase.

Team Progress Alignment with Gantt Chart

- General outline of the Gantt Chart created
- Generalized phases added
- Phase time estimates added
- Some specified tasks created

Plan for this Week

- Create About Page.
- Create a Meet the Team and get members bios.
- Follow the Gantt chart.
- Begin Phase 1
- Add some input option and a plan your trip tab to the website

Member Contributions

- Plan Your Trip being created by Rudolph Hanzes and added to the Meet the Team page.

- Greg Bittinger: Created and added necessary HTML pages to the website. Added week one update. Added all documentation to the website on the "Documentation" page and created buttons to quickly view and download them. Added browser tab icon for Travel Tool. General formatting and bug fixing throughout the website.

- Jacob Johnson: Assisted with the creation of the Gantt chart. Made some adjustments to the "Plan Your Trip" page, adding a section for city and adding a button to continue. Created a page for the user to insert their destination information that is accessible through the previously mentioned button.

- Robert Minerd: Made some over all small adjustments to the website for Travel Tool and helped with the creation of the Gannt Chart for the website.

- Kaleb Piper: Assisted with planning/finding the website to host the project on as well as worked on the details of said site.
